Event	2026 Amyloidosis Symposium: <i>From First Symptom to Focused Care: Optimizing the Amyloidosis Patient Journey</i>
Date	October 30, 2026
Time	7:30 AM – 4:00 PM
Location	Graduate Hotel, Pinnacle Ballroom & Foyer 615 Washington Avenue SE Minneapolis, MN 55455
Exhibitor capacity	Limited to 18 exhibitors

Dear Industry Partners and Healthcare Colleagues,

On behalf of the University of Minnesota, we cordially invite you to support the 2026 Amyloidosis Symposium: *From First Symptom to Focused Care: Optimizing the Amyloidosis Patient Journey*, taking place on October 30, 2026, at the Graduate Hotel in Minneapolis, Minnesota.

Timely diagnosis and coordinated interdisciplinary management are critical to improving survival and quality of life for patients with amyloidosis. Because initial symptoms often overlap with common cardiovascular, renal, and hematologic disorders, bridging educational gaps across specialties is vital.

This symposium provides an interactive, multidisciplinary platform for clinicians, researchers, and trainees to engage with leading regional and national experts in the field. As an industry exhibitor, your participation offers direct exposure to healthcare professionals actively seeking solutions, diagnostic tools, and therapeutic advancements for their patients.

Your support directly enhances our educational programming and fosters meaningful dialogue between clinical teams and industry innovators. Space is intentionally limited to 18 exhibitors to guarantee high-value, face-to-face interaction with our attendees during all dedicated networking periods.

We thank you for your ongoing commitment to medical education and patient care, and we look forward to partnering with you in Minneapolis.

Sincerely,

Binoy Yohannan, MD
University of Minnesota

Sabine Karam, MD
University of Minnesota

Valmiki Maharaj, MD
University of Minnesota

This letter is intended to accompany the attached CME flyer and agenda for the 2026 Amyloidosis Symposium

Exhibitor Package – \$2,000

Become an Exhibitor

We invite your organization to partner with the University of Minnesota to advance multidisciplinary education and improve outcomes for patients living with amyloidosis.

Exhibitor opportunities are limited and available on a first-come, first-served basis.

Limited to **18 Exhibitors**

Package includes:

- ✓ Premier exhibit table in networking area
- ✓ Six-foot exhibit table
- ✓ Recognition in symposium program
- ✓ Recognition on exhibitor badges
- ✓ Opportunity to sponsor or co-sponsor attendee refreshments
- ✓ Promotional materials included in attendee registration bags
- ✓ Direct interaction with multidisciplinary healthcare providers
- ✓ Networking during breakfast, breaks, and lunch

Exhibitor Schedule

6:30 AM – Arrival Time

7:30 AM – Registration & Breakfast

8:00 AM – Opening Remarks

9:30 AM – Morning Break

11:15 AM – Lunch Break

1:45 PM – Afternoon Break

Multiple dedicated networking opportunities are built into the symposium schedule to maximize exhibitor engagement.

For sponsorship opportunities, exhibitor agreements, or additional information, please contact:

Mai Xiong | (612) 625-9100 | cvheart@umn.edu

About the Symposium:

Beyond the Silos:

A Multidisciplinary Approach to Amyloidosis

Amyloidosis remains one of the most under-recognized causes of heart failure, neuropathy, renal disease, and multisystem illness. Earlier recognition and coordinated multidisciplinary care are critical to improving patient outcomes.

The University of Minnesota Amyloidosis Symposium will unite 100–150 experts in:

- Cardiologists
- Hematologists
- Neurologists
- Nephrologists
- Internal Medicine Physicians
- Primary Care Physicians
- Hospitalists
- Fellows
- Residents
- Advanced Practice Providers
- Pharmacists
- Nurses
- Genetic Counselors
- Allied Health Professionals

Participants will explore current advances in:

- Earlier diagnosis
- Risk stratification
- Imaging
- Genetic testing
- Disease-modifying therapies
- Multidisciplinary management
- Emerging clinical trials

Why This Audience Matters

Industry partners will engage with clinicians involved throughout the patient journey, including professionals responsible for:

- ✓ Earlier diagnosis
- ✓ Advanced imaging
- ✓ Genetic testing
- ✓ Pharmacy management
- ✓ Infusion therapies
- ✓ Heart failure management
- ✓ Neuropathy evaluation
- ✓ Renal disease management
- ✓ Clinical trial enrollment
- ✓ Longitudinal patient care

Because amyloidosis requires collaboration across numerous specialties, exhibitors have the unique opportunity to connect with decision-makers from multiple disciplines during a single educational event.

Educational Objectives

Following this activity, participants will be able to:

- Recognize clinical red flags suggestive of ATTR and AL amyloidosis.
- Apply a systematic diagnostic approach using laboratory testing, imaging, biopsy, and genetic evaluation.
- Differentiate ATTR from AL amyloidosis and select appropriate therapies.
- Integrate evidence-based heart failure and rhythm management.
- Evaluate candidacy for advanced therapies including transplant and mechanical circulatory support.
- Discuss emerging therapeutic strategies and clinical trial opportunities.

CME Accreditation: Fairview Health Services is accredited by the Minnesota Medical Association to provide continuing medical education to physicians. Fairview Health Services designates this educational activity for a maximum of 6.25 AMA PRA Category 1 Credits.
